**HUTCHINSON CHOOSES SINGAPORE COMPONENT SOLUTIONS
AS ITS EXCLUSIVE REPAIR STATION IN ASIA-PACIFIC**

Hutchinson has finalized its long-term agreement with Singapore Component Solutions, the joint venture between Sabena technics and Air France Industries KLM Engineering & Maintenance dedicated to component support, to bring a competitive & quality component repair offering to operators in Asia-Pacific.

Both companies have combined their respective skills to offer the Asia-Pacific market a value-adding MRO service solution of Hutchinson products in Singapore. From now on, operators can benefit from extensive capabilities including Engine and APU Vibration Isolation Systems, Engine Component Repairs, Cabin Interior and composite and structural repairs.

“At SCS, we are continuously looking to develop new repair capabilities for operators in Asia-Pacific, and this partnership will allow us to do so.” said Thibaut Campion, CEO of Singapore Component Solutions. *“To be chosen by a major OEM such as Hutchinson is a strong mark of trust. We are proud of this new milestone and we hope to bring our collaboration even further in the near future.”*

“Our partnership with SCS is shaping up; It will, for sure, brings added value to our mutual customers in South East Asia and Pacific Rim region. We are delighted to start our cooperation with SCS. It allows Hutchinson Aerospace Services to complement its network worldwide”, said Norbert Langlois, Executive Vice President of Hutchinson Aerospace Services.

About Hutchinson

Hutchinson designs and produces customized materials and connected solutions to respond to the needs of its global customers, on land, in the air and at sea. A global leader in specific aero structure, thermal and acoustic management, vibration control, fluid management and sealing system technologies, our Group stands out with a multiple market offering spanning multiple areas of expertise and delivering synergies and value-added. Hutchinson reported revenues of €3.9 billion in 2021 and has 38,000 employees in 25 countries. Our ambition is to contribute to safer, more efficient and more responsible mobility for the future.
